

The perfect package to
accelerate virtualisation

Top 10 reasons to virtualise with vGo

1. Save up to **£150,000** on server hardware refresh costs*
2. Save up to **£90,000** on server-related power costs*
3. Reduce IT management costs by up to **90%**
4. Increase typical utilization rates from **5-15%** to up to **80%**
5. Achieve **20-30%** lower cost-per-application
6. Run applications **3x faster** with virtualisation-optimised storage
7. Gain **50%** more usable capacity with unrivalled storage efficiency
8. Reduce backup storage use by **40-60x** with advanced deduplication
9. Reduce downtime risks by up to **85%** with fast one-click data recovery
10. Get all the best of virtualisation in one solution:
 - Best Virtualization Platform / Technology of the Year – VMware (InfoWorld Awards)
 - Best Hardware Platform for Virtualisation – Cisco UCS (VMworld Awards)
 - Best SMB Network Storage – EMC VNXe (CRN Awards)
 - Best Backup and Recovery – EMC NetWorker and EMC Data Domain (CRN Awards)
 - Total support from Synapse360 – innovator in pre-integrated virtualisation solutions, and an EMC Premier Partner of the Year

*VMware estimates of cost saving over 3 years, based on consolidating 50 servers.
